Tips for the facilitator:

If this is your first time facilitating a digital workshop in MURAL or you just need a refresher, here are a few tips and tricks to make you look like a pro:

- Invite contributors to the canvas and test access in advance of your online workshop.
- Timebox activities and use the built-in timer to keep each activity on track.
- Use different colored squares (pseudo post-it notes) for each lane in the Customer & Employee Journey Map.
- Take screenshots of touchpoints and interactions that will provide additional context into what the experience looks and feels like. Scale screenshots down to visually line up with the customer behavior.
- Add icons to visually illustrate attitudes and emotions, powered by the Noun Project.
- Leverage the voting feature to prioritize 'how might we...' questions by voting anonymously.
- Spread the workshop out over time. Try scheduling multiple "power hours" with time in between to tie up loose ends and prepare for the next wave.
- To bring the group back together, summon everyone to where you are in the canvas. Rest assured knowing everyone's seeing what you're seeing.

TIP:
Use MURAL's timer feature to stay on track!

1 Visualize the **Customer** and **Employee** interactions and touchpoints using Journey Mapping

Working as a group, map the experience of the people your company serves leveraging the customer lifecycle. Include customer behaviors, touchpoints, and attitudes/emotions. Next, map the experience of the employees engaged in facilitating and delivering the customer experience. Include internal processes, teams/groups, systems/tools and pain points. 4 hours
